

# MANN ART NEWS

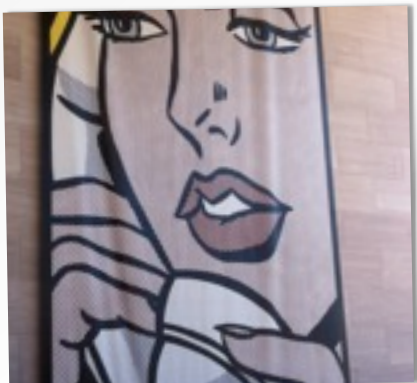

DELIGHTED IS THE EXACT WORD  
WHEN **KINDERGARTEN** ASKED IF  
THEY COULD SKETCH THE  
BRIDGES BY 5TH GRADE!

## Art at our fingertips, we are so fortunate!

This fall I have been approached by faculty and students telling me about the great exhibits that they have seen in our area! Below are the locations and from this great sharing. I set up a "Centaur Art Review" post outside the studio. Photo p.2.

We are also excited about the access to YouTube. **Fourth graders** have already seen a weaving, yes weaving, video set to music! We will continue to research this resource so our students can directly hear and see visual art experiences from the artists

themselves! I also like the idea of students being able to preview a several step process the night before art class, 7 min or less of course! We have excellent local artists to check out!

### Artsonia

Our online student gallery is growing. If you would like to photo work too, please let me know!

We could really use technology beyond one iphone. Camera's are still possible, but very similar to "if I could helicopter to NYC in one hour vs. driving four"...I'd take that route! There is now an app for iphone, ipad and soon android. Our funds raised are close to purchasing an ipad mini. Please check out Artsonia to view your child's artwork!

### icreate!

An after school art class, continues to meet on Tuesdays 3:45-5:00 thru June reserve your spot!
